

FAQs

What is Fiber-To-The-Home (FTTH)?

FTTH is a method of delivering telecommunications services. Most service providers rely on copper or coaxial wire to deliver services from their core network to customers' homes. Home Telecom, on the other hand, uses fiber directly from our core all the way to each individual home. Frequently, other providers boast about their fiber optic networks, but what they don't tell you is that while those fiber networks may be in your neighborhood, their connections to your home are much slower because they are non-fiber. And, since a chain is only as strong as its weakest link, you end up not getting the benefit of fiber-optic speed. We provide the widest bandwidth, highest speed Internet through a fiber-optic connection run directly to your home.

Why is FTTH better than other delivery methods?

FTTH delivers the highest speed broadband connections available today—up to 500 Mbps!—and is the only technology that will be able to keep up with the unknown demands of tomorrow. No matter what the future brings having fiber directly to your home ensures that you will be able to experience it.

FTTH also provides you with increased reliability because it is less susceptible to inclement weather, such as lightning, and is easier to maintain remotely. Potential network issues can be identified and resolved seamlessly to you.

What is Velocity?

Velocity is Home Telecom's suite of services that are offered over our FTTH architecture. With Velocity HD Video, Internet and Phone services, customers receive a truly amazing picture, the fastest download speeds with matching upload speeds up to 100 Mbps, and increased levels of bandwidth capacity. Velocity enables a wide array of applications, including telecommuting, online gaming, interactive content, home shopping, telemedicine, and audio/video on demand from multiple devices at a time.

FEATURES

- Today's fastest speeds - up to 500 Mbps
- Symmetrical speeds*
- Quick, easy setup
- 8 e-mail accounts
- Always on, always connected
- No usage limits

ALL RESIDENTIAL PLANS ALSO INCLUDE

- Dynamic IP address
- 24/7 technical support
- Trend Micro Internet Security

WITH HOME TELECOM'S HIGH SPEED INTERNET SERVICE, YOU GET:

Unlimited Access: There are no time or data restrictions on your Internet usage. With Home Telecom, you receive unlimited service for one flat fee.

E-Mail Addresses: You get eight e-mail addresses with your residential account. Additional addresses are available for a monthly charge of only \$3.00 each.

Internet Security: Free Trend Micro Internet Security Software. Available to all High Speed Internet subscribers (a \$89.95/year value).

*Installation charges apply. All services/speeds not available in all areas. Listed speeds are "up to" speeds and are not guaranteed. There are many factors that may cause actual speeds to vary that are outside of our control such as equipment used and external network conditions. Symmetrical speeds are up to 100 Mbps. With MyWiFi an installation fee applies. The first 4 wireless devices are included in the installation fee; additional devices can be networked for a one-time fee of \$9.95 per device. Devices must have wireless capabilities and meet minimum system and security requirements. Must be a Home Telecom high speed Internet subscriber.
