

HOMEMATE

HomeMate is a medical alert system specifically designed to protect seniors and family members in a home medical emergency.

Services can help seniors remain independent and possibly avoid a retirement home by sending help fast in the event of a fall, fire, or home invasion emergency. Senior health and longevity is as simple as a push of a button allowing independent seniors to live alone without ever being alone.

Security Equipment Maintenance

The Security Equipment Maintenance Program guarantees the Security system is in good working order and provides the required protection at all times. This added level of control over the equipment will prevent problems from going undetected.

For a monthly fee of \$4.99*, the following items are provided by the plan:

- Technicians will perform a 10-Point check during any visit to your location involving Home Telecom Security services.
- All equipment/battery issues that are covered by the agreement will be repaired at no additional cost.**

*Installed Security equipment has a 12 month warranty included. Customers not opting for the plan, but still under the 12 month manufacturer warranty, will be charged \$75/hr for repair of equipment under warranty, but no equipment charges. All customers opting for the Equipment Maintenance Plan will incur a monthly fee beginning the 13th month of their contract.

**When a low battery signal is transmitted to Home Telecom's monitoring center, Home Telecom will dispatch a technician to replace the battery and perform the 10-point check. After the initial warranty period, a customer opting out of the plan will pay regular parts and labor fees.
