

## MyWiFi Xtreme App Install

**MyWiFi Xtreme App Overview:** Ever wanted control of your WiFi system without the hassle of dealing with your provider? Well now you can with the new MyWiFi Xtreme app! You will gain the ability to set up your own WiFi networks, set up a guest network, run speed tests, and create profiles with specific devices. You'll even be able to cut off WiFi to profiles with the touch of a button! You now have Xtreme WiFi accessibility at your fingertips!

**Download the App:** In just a few easy steps, your WiFi will be ready to use. MyWiFi Xtreme can be downloaded from any app store that is compatible with iOS and Android devices.

- 1 Go into your app store to search & download **MyWiFi Xtreme**.
- 2 Open the app and select **Sign Up** near the bottom of the screen.
- 3 Follow the prompts to enter your personal information. This password will be used to access the app. Click **Sign Up** when you are done.
- 4 You will now be in router configuration. This step should be done after the router has been plugged in and has been 'fully powered on' for 10 minutes.  
Point your camera at the **QR code** on the router. Once your barcode is detected, you will automatically be sent to the next step.
- 5 Now you can set up your own personal WiFi Network Name (SSID) and Password, as well as name your router.  
Click **Next** when you are done and enjoy MyWiFi Xtreme!
