

# Quick Start Guide:

Setting up your MyWiFi Xtreme Extender

1

Connect the Extender to power outlet.

2

When the LED is flashing red, you can pair the Extender with the MyWiFi Xtreme equipment. Press and hold the WPS buttons on the Extender and then the MyWiFi Xtreme equipment for 3 seconds each. You will need to complete this in less than 30 seconds. The LED light on your MyWiFi Xtreme equipment will flash green while attempting to pair.

3

Use the solid green LED indicator (displays for 60 seconds at end of pairing cycle) to determine ideal location for the Extender. If necessary, relocate it to a more ideal distance from the MyWiFi Xtreme equipment and confirm successful pairing after the Extender reboots (repeating steps 2-3 as needed).

Extender location is ideal distance from the MyWiFi Xtreme equipment.

Ideal: Steady State

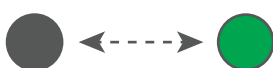

Move close to the MyWiFi Xtreme equipment.

Too far: Slow Blink (1000 msec)

Move Extender farther away from the MyWiFi Xtreme equipment.

Too close: Fast Blink (250 msec)

4

Now you can use the MyWiFi Xtreme app to check on the status of your Extender whenever you'd like!
