my WiFi XTREME

HOME TELECOM

Self–Upgrade Activation Guide

Thank you for boosting your signal with MyWiFi Xtreme.

This installation document will guide you through the setup of your new Wi–Fi Router.
For This Process You Will Need:

Wi-Fi Router

Ethernet →
Wan Port →
Power →

2.5G 5
2.5G

Power Cord and Ethernet Cable(s)

STEP 01 Locate Your Current Wi-Fi Router

1a: This will be the location for your new Wi–Fi Router, which is already optimally situated in your home.*

1b: Remove the power cord only from your current Wi–Fi Router and unplug it from the wall socket. Do not unplug any other cables at this time.

*Should your Wi–Fi set up include an indoor ONT, please ensure your new Wi–Fi Router is separated by 2–3 feet to prevent interference with the indoor ONT.

STEP 02 Unpack Your New Wi-Fi Router

2a: Position the new Wi–Fi Router in the location of your current one.

2b: Locate the new power adapter in the box, and insert the cord into your new Wi–Fi Router.

2c: Plug in the new power adapter into the wall socket.
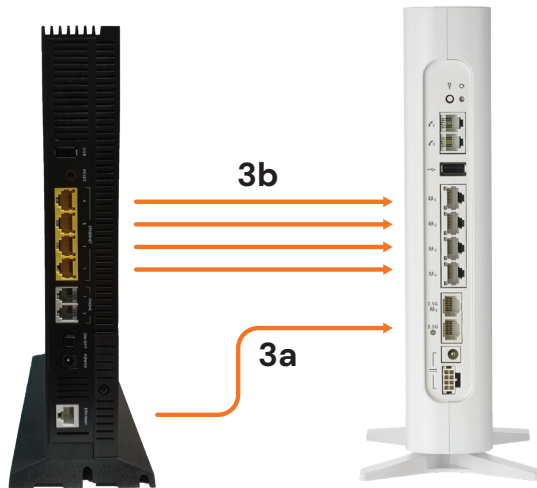

2a

2b **2c**

STEP 03 — Connect the Cables

3a: Locate the WAN port on your existing Wi–Fi Router. You will now disconnect that cable and move it to the new router WAN port.

3b: Repeat the same process for any Ethernet cables on your current router and move them to the same ports on your new Wi–Fi Router.

3c: After approximately 10 minutes, a solid green light will indicate a successful boot–up. You are now ready to download the MyWiFi Xtreme app and add devices.

If the color does not change from a solid yellow or is red, verify that the WAN cable is connected to the correct port.

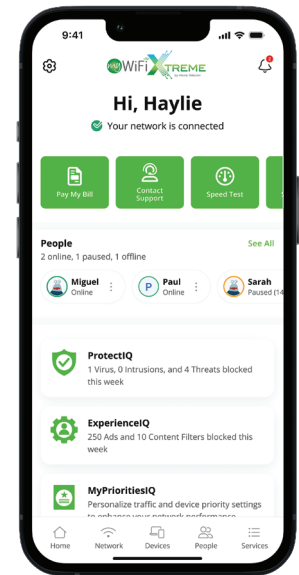

STEP 04 — Set Up MyWiFi Xtreme App

Download the MyWiFi Xtreme app from the Apple or Google Play store.

GET IT ON Google Play

Download on the App Store

Once you download the app, follow the prompts to create an account and login.

After creating an account, please scan the QR code located on the bottom of your Wi–Fi Router or the side of the box it came in (CLEI) to onboard the new Wi–Fi Router. (If you have trouble with the QR code, you can enter the details manually).

Scan this code to visit our site for instructions.
