Cable Box Self Install Guide

Equipment Diagram

Install Your Cable Box

- **1** Turn off your television and make sure it is unplugged.
- **2** Place the cable box near the back of the television. It will also need to be near a power outlet and the cable connection.
- **3** Look for the cable connection on the back of the box. Usually on the far left and labeled Cable In or Cable In/Out. Use the cable connection that extends from the wall and screw it into the back of the cable box. **Ensure the cable is securely screwed into the box and outlet in the wall before moving forward. Screw it clockwise to tighten.*
- **4** Insert one end of the HDMI cable into the back of the cable box.
- **5** Extend the other end of the HDMI cable to the back of the TV and insert it into HDMI port 1. (We recommend using port 1, but you may use another HDMI port, just be sure to note which one you use.) **If you need instructions for a standard connection without HDMI cables, go to homesc.com/howto**
- **6** Place the power cord in the power port on the back of the cable box. Then connect the plug in the nearest power outlet.
- **7** Set the cable box on your entertainment center. The front should be facing toward you so you can see the power signals. Ensure it has two inches of space at the top and on the sides.
- **8** Plug your television back in and turn it on. Be sure the television is set to the input or source for HDMI port 1. (Or whichever port you attached the HDMI cable to.)

PLEASE INSTALL ALL BOXES BEFORE PROCEEDING TO STEP 9

- **9** Call Home Telecom's dedicated self installation line, 888-254-2020, from a contact telephone number associated with your account to complete the provisioning of your box.
